PROFILE

- Computer Engineering student with expertise in frontend development (React.js, Angular, Bootstrap, Tailwind CSS) and React Native app development. Dedicated to solving real-world problems through innovative technology.

SKILLS

- Technical Skills:**
 - Programming Languages:** Python, Java, C, HTML, CSS, JavaScript
 - Frameworks/Libraries:** ReactJS, Angular, React Native, Redux, Bootstrap, Tailwind CSS
 - Tools/Platforms:** GitHub, ExpoGo, Webpack, Babel, VS Code, IntelliJ IDEA
- Industry Skills:** Web Development, Cross platform mobile app Development, Version Control(Git), RESTful API Integration, Responsive Design, State Management

PROFESSIONAL EXPERIENCE

- Frontend Developer Intern, HumBee Studios** Oct 2022 – Feb 2024
- Led the development and optimization of 6+ web applications using Angular, HTML, CSS, Tailwind, and Bootstrap, achieving a 30% improvement in user experience and performance metrics.
 - Collaborated across teams to integrate 20+ new features, conducted thorough code reviews, and reduced bugs by 25%, ensuring project alignment with requirements.
 - Integrated 15+ APIs into web applications, significantly enhancing functionality and user engagement.
 - Managed a team of 5 members, assigned tasks, provided guidance to interns, and successfully managed the delivery of 3-4 projects simultaneously.

EDUCATION

- B. Tech Computer Engineering, LJ University** Nov 2021 – 2025
CGPA - 8.22
- Higher Education (GSHEB), Karmachari Sikshan Tirth, 85.38%** Jun 2019 – Apr 2021
- Secondary Education (GSEB), Karmachari Sikshan Tirth, 86.67%** Jun 2017 – Mar 2019

ADDITIONAL SKILLS

- Languages:** English, Gujrati, Hindi
- Hobbies:** Cooking, Sketching, Gardening, Learning a new Language

PROJECTS

- PlantHub (ReactJS, Django)**
- Built a responsive plant knowledge website, featuring detailed information on 600+ plant species, accessible across all devices.
 - Selected among the top 20 projects out of 260+ entries in a competitive college showcase, recognized for innovative design and technical execution.
- WeatherLytics (React Native, API Integration)**
- Developed a mobile weather application using React Native for real-time weather updates and forecasts.
 - Enhanced user experience with a clean, intuitive UI, focusing on real-time weather updates and seamless functionality.
